

CORRIGENDUM to Polvani and Kushner (GRL, 2004)

On page 18-4 at line[24], the end of the sentence should say $k_{max} = 1/(0.5 \text{ days}) = 2 \text{ days}^{-1}$. In other words, the time scale that was used for the sponge at the top of the model is “half a day”. We are grateful to Alan Plumb and Cegeon Chan of MIT for noting this typo.

[lorenzo m. polvani – Collumbia University – 11 November 2006]
