

Columbia Chemistry Careers Committee

Tips and Tricks to Landing a Job in Academia

C4 invites you to join panelists Tristan Lambert, and Ruben Gonzalez, both Assistant Professor's in the Department of Chemistry and Sarbajit Banerjee, Postdoctoral Associate, Department of Applied Physics and Applied Mathematics to discuss the **Process of Securing an Academic Job** from the start (putting together your CV) to the finish (getting a graduate student to join your lab). Do you know: What makes a promising academic candidate? What does the application package include? What the interview is like? How would one evaluate different institutions and ultimately decide which offer to accept? What the current job market is like for chemistry professors? Come with your questions and listen to some good advice about getting your search well on its way.

Panelists:

Tristan Lambert, Assistant Professor, Department of Chemistry
Ruben Gonzalez, Assistant Professor, Department of Chemistry
Sarbajit Banerjee, Postdoctoral Associate, Department of Applied Physics and Applied Mathematics

Tuesday, February 27, 2007
1:00 pm
7th Floor Lounge, Havemeyer Hall

Refreshments will be served
