
Climate Action Plan

Think about your school / community and everything you've learned about climate change at the summit. Brainstorm ways your school / community can change or things they could do to have a positive impact on the climate and environment.

First Step: Map out (or list) areas in your school or community and discuss how/where in those areas sustainability could be improved (i.e. cafeteria, classrooms, restaurants, home, parks, neighborhood, city, office).

Develop a Climate Action Plan (CAP) for one or two of these areas (**highlight** areas covered by your CAP):

Energy Efficiency & Use	Local Food	Chemical Use in Schools	Climate Change Curriculum
Water Efficiency & Use	Composting	Student Transportation	Resiliency
Waste Management/ Recycling	School Gardening/ Farm to School	Environmental Policy	Environmental Justice
Divestment	Media/Communicating Climate	Environmental Restoration	Community Events

Other (please specify other areas covered by your CAP):

Our project(s) is (write a sentence or two):

1. What actions will we take to reduce our school's footprint? Set up to 3-5 goals for this project that are Specific, Measurable, Achievable, Realistic, and Time-bound (achievable by a date).

2. Who will make this project happen? Depending on your goals, others may need to participate. **Highlight** these people in the following table

Students	Faculty	Administrators	Board of Education	Sustainability Coordinator
Experts/	Food Service	Facilities	Parents	Community

Consultants				Members
-------------	--	--	--	---------

Others (please specify):

3. What steps do we need to achieve to accomplish our goals? Create a calendar for each activity. A more detailed calendar is provided on the last page.

<i>This School Year</i>	<i>Short Term (1-2 years)</i>	<i>Long Term (3-5 years)</i>

--	--	--

- 4. What will we need to accomplish our goals? (Do we need supplies, travel, equipment, posters? What will the cost of these items be? From where will the money come? You may not have the specific costs but you can and should list the materials.)**

5. How will we monitor and measure our success? (Who will monitor? What methods can we use?)

6. Who do we need to keep informed regarding our progress?

7. How can we spread the word about what we are accomplishing? (e.g. press release, presentation, flyer, video, social media)

8. List 3 communication goals

9. Timeline

Month/ Year	Goals	Activities
