FEBRUARY 11, 2008

TIME: 6:30pm

WHERE: CEPSR  
Interschool Lab,  
Room 750

TERADYNE

Come and join the

as we bring you our next **employee presentation**, courtesy of

Columbia Electrical Engineering alumnus and current Teradyne employee John Mullervy will be present to share his thoughts on Teradyne and the transition from Columbia to the corporate world.

Bring your talents to Teradyne and join a leader in the Automatic Test Equipment industry. At Teradyne, we work with the largest and most dynamic electronics manufacturers in the world. We play an integral role in designing the hardware and software that tests a spectrum of device technologies before they hit the consumer market. Handheld devices, wireless technologies, gaming systems, automotive sensors – if it's the latest game console flying off store shelves or a car airbag deploying to save a life, there's a very good chance test equipment designed by Teradyne is making it happen.

- . **Bring your resumes!**
- . **Refreshments will be served.**
