

IEEE Meeting 5/14

Attendees:

Daniel, Jiasi, Natalia, Sam, Pat

Ideas for 2009-2010 Academic Year

- 1) Participating in competitions, such as Natcar
 - Speak to Kris about competitions to find out whats out there
 - Stuff with local schools
 - Send email out to entire electrical engineering department about competition
- 2) Company Presentations
 - Sun Microsystems?
 - Sam will try to get BA systems to give a talk
- 3) Trips
 - We should go to Brookhaven again
 - MTA power plant tour
 - NXP
 - Talk to John about getting Consumer Reports to give us a tour
 - Talk to Shepherd about touring IBM
- 4) Survey
 - Send it to entire google group and to entire electrical engineering student body
 - Should ask students what they want from us, what they enjoy most abt IEEE events, which events they attend, etc.
- 5) General Body Meeting at very beginning of semester
 - Make an event out of it
 - In past, nothing was done at the event so we need to make it rockin'
 - Way to kick of year strongly because few groups hold large events then

- Could make it into a huge event like the 125th party (if so we would need to do it with Ferris Reel and arrange some type of deal for who pays for what and how much tickets cost

6) Lab Tour

- Labs besides just EE labs, otherwise we never get to see them
- People really learn a lot from it

7) Panel for EE industry

- Bring in different representatives from companies
- Should be done in conjunction with Career Services

8) Lab Session for non-EE ppl with Valancourt?

9) Undergrad research presentation

- Keep it short and interesting
