Only informed consent that includes the elements described in Subdiv. 2b constitutes “informed consent” for Genetic Testing per NYS 79-L. Per Subdiv. 2c, general research consent obtained under Subdiv. 9a with the elements of 9e does not constitute “informed consent” for Genetic Testing per NYS 79-L; however, the law allows a general waiver of informed consent for Genetic Testing if general research consent as described in Subdiv. 9e is obtained.
