CONDITION: (give number of vols., boxes, or shelves)

Bound: \_\_\_\_\_ Boxed: \_\_\_\_\_ Stored: File Cabinets, Stack 13

LOCATION: (Library) Rare Bk &amp; Man. CALL-NUMBERS 1. Speech Record

2. Speech Lab

3. Tape Record

RESTRICTIONS ON USE

See RESTRICTIONS under Speech Lab Archives 4. American Speech

MANY RECORDS ARE ON ACETATE OR ALUMINUM DISCS AND CAN ONLY BE  
BE PLAYED WITH CACTUS OR FIBER NEEDLES: Speech Laboratory Archive  
discs many not be used without the permission of the Librarian for  
Rare Books & Manuscripts; user must use the tape copies for listening.DESCRIPTION: The Speech Recordings Library is composed of experimental,  
non-commercial, commercial and radio broadcast phonograph records and  
tape recordings containing a wide range of spoken arts, documentary and  
some musical recordings which include speeches, lectures, interviews,  
prose and poetry readings, dramatic readings and dramatic performances,  
language series and some folk music. ~~Since the Rare Book Room has no~~  
~~listening facilities, the user must request recordings in advance~~  
~~that they may be delivered to the Rare Book Room for listening.~~ The  
collection is divided into four subunits, each with its own card catalog.

1. Speech Recording Collection: Chiefly commercial recordings and radio broadcast transcriptions made ca. 1925-1965, of twentieth century American and English authors reading selections from their own works as well as readings by others of American and English literature. There are several series of American and English language records covering dialects, diction conversation, pronunciation and grammar. In addition there are French, German, Spanish and Italian language series emphasizing conversation and pronunciation. Another series contain talks by famous scientists such as Edward Teller. The musical recordings include an African folk music series and several American musical selections such as Leadbelly and Bob Crosby's Bob Cats. The radio broadcasts include speeches by Franklin D. Roosevelt, interviews, a selection of the "Eternal Light", the National Broadcasting Company's religious series prepared by the Jewish Theological Seminary,

these  
records  
store of  
caustic  
needles

several radio plays, including Orson Welles' famous "War of the Worlds" broadcast, and a Columbia University series on venerable diseases. The majority of these records are 78 r.p.m. and many are on acetate or aluminum discs requiring the use of cactus or fiber needles to be played. In addition some discs must be played from inside out. There are a small number of 33 1/3 r.p.m. discs. (ca. 700 discs)

2. The Speech Laboratory Archives: A series of experimental and non-commercial recordings made at Columbia University, chiefly during the 1930's. Included are literary and dramatic readings, many read by twentieth century American and English authors themselves, American and English language dialect recordings, American Indian folk music, lectures and speeches given at Columbia University by visitors and Columbia faculty and many political speeches. A sample list of names include: Henry Morgan Ayres, W. H. Auden, Nicholas M. Butler, John Erskine, Robert Frost, William Cabell Greet, Herbert Hoover, Vachel Lindsay, Alfred E. Smith, Eleanor and Franklin Roosevelt, Gertrude Stein, Blanche Yurka. These 78 r.p.m. discs were made on aluminum and acetate and can only be played with a cactus or fiber needle. Although the original records are kept in storage, they were re-recorded on a series of 69 tape reels by the Library of Congress. Users must listen to the tapes. The Library of Congress retains the master tape reels, from which copies may be made. Requests for copies must be addressed to the Librarian for Rare Books and Manuscripts. (ca. 1,250 discs)

3. The Tape Recording Collection: Recordings made ca. 1925-1965, many of which are re-recordings from phonograph records. Included are literary, dramatic and public affairs recordings. A majority are of Shakespearean plays. A selected list of those on tape include: Bertold Brecht, Adolph Hitler, John F. Kennedy, Gamal Abdul Nasser and Louis Simpson. Also included are 160 reels of tapes of radio broadcasts on Hungarian radio stations during the 1956 revolution. (ca. 300 reels)

4. American Speech Recordings Collection: A series recording samples of American dialects. The project was conducted by William Cabell Greet. The card catalog arranges dialects geographically by state and subdivides by local place names. These records were made on acetate or aluminum requiring the use of cactus or fiber needles. Many have been re-recorded as part of the Speech Lab Archives and the Speech Recordings Collection listed above. (ca. 280 discs)

SPEECH LAB ARCHIVES  
SUPPLEMENTARY SERIES

There are no individually typed library cards for each of the following groups of records. However, a general card has been typed and filed under the indicated headings. The records themselves are located in separate groups immediately after the regular record collection in the Speech Lab Archives cabinets, i.e., after record no. 1063. No individual cards were typed since there were no original four by six cards for these records. If cards are typed in the future, the subject headings must be taken from the photocopy of the tape recordings.

No cards for the following:

- 1) The series with the "W" prefix before the record number. (This series includes record numbers W1 to W206). They are recorded on tapes 77 B to 83 A inclusive.. This series is a variety of recordings, but most concern the speaking habits, history, and culture of the Williamsburg, Virginia area. Other areas of the country are the subjects of a few of the records in the set. A general card is filed under the heading *Williamsburg, Virginia*. (See *Williamsburg Section in American Speech Recordings Cat.*, original 4 X 6 cards)
- 2) The "Glass Discs" series includes 78 records consecutively numbered and clearly labeled, but with no identifying prefix. They are recorded on tapes 83 A to 88 A inclusive. The series is concerned with various aspects of life in England. A general card is filed under the heading *England*.
- 3) Unnumbered aluminum records on tapes 88 A-90 B. These records are on miscellaneous subjects and do not lend themselves to a general heading. Twenty-five records are included in this set.
- 4) The "1935 Dialects Series" and the "1936 Dialects Series" are recorded on tapes 95 A to 108 A inclusive. The series records the speech patterns of students(?) from different parts of the U.S. The 1935 group contains 109 records; the 1936 series has 121. General cards are filed under the heading *American Speech* and *Dialects Series*. (See *original American Speech Recordings Catalog*.)

BL  
2 May 1974

Records with the numbers 32VBR 1-22 recorded in Madison County, Virginia have cards for them in the Speech Lab Tape Archives Catalog. They have been taped on to Tape 111-112. LC does not have a master for these two tapes.

SPEECH LAB ARCHIVES  
SUPPLEMENTARY SERIES

There are no individually typed library cards for each of the following groups of records. However, a general card has been typed and filed under the indicated headings. The records themselves are located in separate groups immediately after the regular record collection in the Speech Lab Archives cabinets, i.e., after record no. 1063. No individual cards were typed since there were no original four by six cards for these records. If cards are typed in the future, the subject headings must be taken from the photocopy of the tape recordings.

No cards for the following:

- 1) The series with the "W" prefix before the record number. (This series includes record numbers W1 to W206). They are recorded on tapes 77 B to 83 A inclusive.. This series is a variety of recordings, but most concern the speaking habits, history, and culture of the Williamsburg, Virginia area. Other areas of the country are the subjects of a few of the records in the set. A general card is filed under the heading *"Williamsburg, Virginia, (See Williamsburg Section in American Speech Recordings Cat., original 4 X 6 cards)*
- 2) The "Glass Discs" series includes 78 records consecutively numbered and clearly labeled, but with no identifying prefix. They are recorded on tapes 83 A to 88 A inclusive. The series is concerned with various aspects of life in England. A general card is filed under the heading *"England,*
- 3) Unnumbered aluminum records on tapes 88 A-90 B. These records are on miscellaneous subjects and do not lend themselves to a general heading. Twenty-five records are included in this set.
- 4) The "1935 Dialects Series" and the "1936 Dialects Series" are recorded on tapes 95 A to 108 A inclusive. The series records the speech patterns of students(?) from different parts of the U.S. The 1935 group contains 109 records; the 1936 series has 121. General cards are filed under the heading *"American Speech," and "Dialects Series, (See original American Speech Recordings Catalog.)*

BL  
2 May 1974

Records with the numbers 32VBR 1-22 recorded in Madison County, Virginia have cards for them in the Speech Lab Tape Archives Catalog. They have been taped on to Tape 111-112. LC does not have a master for these two tapes.
