The NEW YORK DIRECTORY

For 1786

Illustrated with a Plan of the City

Alfo Changes in the Names of Streets

PREFACED by a General Defeription by NOAH WEBSTER

Publifhed by THE WINTHROP PRESS 32 LAFAYETTE PLACE NEW YORK THIS edition, limited to 613 copies, was arranged, printed and bound at The Winthrop Press, 32 Lafayette Place, New York, this year of our Lord nineteen hundred and five, of which this copy is number in presented to Douglas N. Cooke

> GIFT OF JAMES G. PHELPS STOKES

978N48 N443

PREFACE.

T a great expenditure of time and labor, we have reprinted this most interefting little volume—the "New York Directory for 1786," —the first one of its kind in our city. It was iffued at a time when this great Metropolis of ours was still in its infancy, and the reader will note with interest the

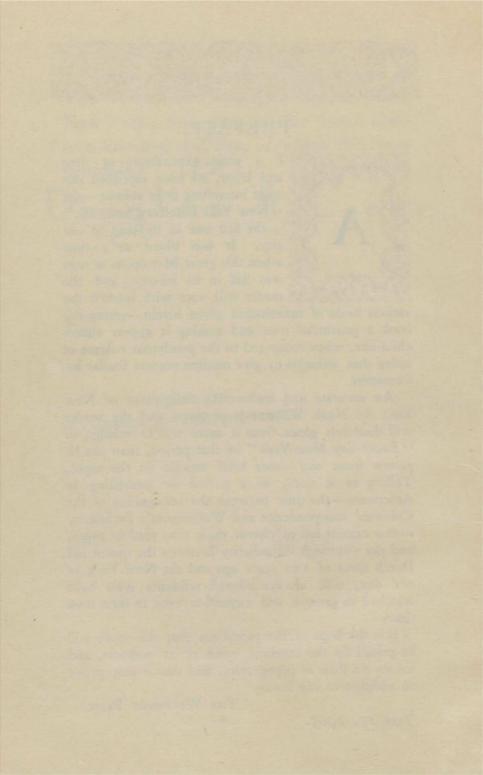

various items of information given herein—giving the book a provincial tone and making it appear almost child-like, when compared to the ponderous volume of today that attempts to give modern readers fimilar information.

An accurate and truftworthy defcription of New York by Noah Webfter is prefixed, and the reader will doubtlefs glean from it more real knowledge of "Every-day New York" of that period, than can be gotten from any other brief treatife on the topic. Telling as it does, of a period so interefting to Americans—the time between the recognition of the Colonies' independence and Wafhington's Prefidency —this cannot fail to charm thofe who read its pages, and the thorough diffimilarity between the quaint old Dutch town of 120 years ago and the New York of our day, will always intereft refidents who have watched its growth and expansion even in their own time.

It is the hope of the publishers that this work will be prized for the intrinsic value of its contents, and for its old flyle of typography, and that it may prove an addition to any library.

THE WINTHROP PRESS.

June 17, 1905.

DESCRIPTION OF NEW YORK by NOAH WEBSTER

HIS city flands on the South-weft point of an ifland, at the confluence of the Hudfon and Eaft-River. The principal part of the City lies on the Eaft fide of the ifland; altho the buildings extend from one river to the other. The length of the City, on the Eaft

River is about two miles; but falls much fhort of that diffance on the banks of the Hudson. Its breadth, on an average, is nearly three-quarters of a mile; and its circumference may be four miles.

The plan of the city is not perfectly regular, but is laid out with reference to the fituation of the ground. The principal fireets run nearly parallel with the rivers. Thefe are interfected, tho not at right angles, by fireets running from river to river. In the width of the fireets, there is a great diverfity. Water-fireet and Queen-fireet, which occupy the banks of the Eaft-River, are very conveniently fituated for bufinefs, but they are low and too narrow; not admitting, in some places, of walks on the fides for foot-paffengers. Broad-fireet, extending from the Exchange to City-hall, is fufficiently wide. This was originally built on each fide of a creek, which penetrated almost to the City-hall. This ftreet is low, but pleafant; and that part which did not fuffer by the fire during the war, is generally well built; the other is recovering from its ruins.

But the moft convenient and agreeable part of the city is Broadway. This ftreet runs upon the height of land between the two rivers, beginning at the fort, near the South end of the city, and extending to the Hofpital, in front of which it opens into an extensive plain or common. This ftreet is wide, and elevated fo as to command a delightful prospect of the town, and the Hudfon.

Wall-ftreet is generally wide and elevated, and the buildings elegant. Hanover-fquare and Dock-ftreet, are conveniently fituated for bufinefs, and the houfes well built. William-ftreet is alfo elevated and convenient, and is the principal market for the retailing of dry goods. Many of the other ftreets are pleafant, but moft of them are irregular and narrow.

The houfes are generally built of brick, and the roofs tiled. There are remaining a few houfes built after the old Dutch manner; but the English taste has prevailed, almost a century.

Upon the South-weft point of the ifland flands the fort, which is a fquare with four baftions; within the walls of which the Governors used formerly to refide. Below the fort, near the water, there is a line of fortifications of confiderable extent, defigned to command the entrance into both rivers. But it is queftionable whether any number of cannon would prevent fhips from paffing with a favorable wind and tide; and indeed whether New York is capable of defence by land against a powerful marine force. The battery however, in the fummer feason, furnishes the

citizens with an agreeable walk, which is open to refreshing breezes from the bay.

The City-hall is a brick building, more ftrong than elegant. It is three flories in height, with wings at each end, and fronts Broad-ftreet, which affords an extensive prospect. The first floor is an open walk, except two fmall apartments for the door-keeper and city watch. In the fecond flory of the Eaftern wing, is the Affembly-chamber, now occupied by Congress, and adorned with the following paintings: The portrait of the great Columbus, belonging to the Affembly of this State; a painting valuable only for its antiquity and the character of the man-the likeneffes of the King and Queen of France, as large as the life, executed in a mafterly manner, and prefented to Congrefs by his Moft Chriftian Majefty; equally valuable for the richness of the paintings, the dignity of the perfonages whom they reprefent, and as pledges of royal friendship. The likeness of General Washington, prefented by a gentleman in England; a likenefs dear to every American, and deftined to grace the walls of every Council chamber in the new world.

The Weftern wing contains a room for the Council or Senate, now occupied by the Secretary of Congrefs, and another for the Mayor's Court. In the body of the houfe is a fpacious hall for the Supreme Judicial Court.

There are three houfes of public worfhip belonging to the Reformed Proteftant Dutch Church, one is called the Old Dutch Church, which was built in the year 1693, and rebuilt in the year 1766; and another is called the North Church, which was founded in the year 1767, and dedicated to the fervice of God, in the year 1769. This laft church being ruined by the Britifh during the late war, was repaired in the year 1784, and has been ufed with the old church for the performance of divine fervice. The *middle church* generally called the *New Dutch Church*, was built in the year 1729: it is the moft fpacious of the three, but was alfo ruined in the war, and is not yet fully repaired.

The people of this denomination were the first fettlers of this State, and make a respectable part of the citizens. The church in the city is confidered as one church or congregation, though worfhipping in different places. The charter, or act of incorporation, was granted by William the Third, in the year 1606, when Benjamin Fletcher, Efg., was Governor of the Province. The Minifters, Elders, and Deacons, are the body corporate, and hold confiderable property. Many years before the war, they found it neceffary, by reafon of the decline of the Dutch language, to have fervice performed in Englifh, and had then two Dutch and two English Minifters. Since the war, it has been performed chiefly in English, and they have at prefent only two Minifters.

There are four Prefbyterian Churches in the city of New York. The firft was erected in the year 1619. It was built of ftone, and rebuilt and enlarged in the year 1748. It is eighty feet long and fixty wide, with a cupola and bell; and ftands in the upper end of Wall-ftreet, the North fide of the ftreet, near the Broadway. The fecond was erected in the year 1767, is a genteel brick building, thirty-three feet long, and fixty-five feet wide, with a fteeple not

finished; it stands on the East fide of the green, at the head of Beekman and Nassau-streets.

The congregations worfhipping in these churches are connected with each other, under the care of the fame Ministers, who preach alternately in them, and having the fame Elders and Deacons; their temporalities also are managed by the fame Trustees, incorporated under the law of the State passed in April 1784, capacitating religious focieties of every denomination to incorporate themselves, for the purposes therein mentioned.

The third Presbyterian Church was erected in the year 1768, is a genteel stone building, fixty-five anda-half feet long, and fifty-five and-a-half feet wide; and stands in Little Queen-street, not far from the Broadway. This church is also incorporated agreeably to the fame law.

These three churches were occupied by the British during the late war, as hospitals and barracks, and were left by them in a most ruinous fituation, and have been repaired with great neatness, and at a very great expense, by their respective congregations, fince the peace.

The fourth Prefbyterian church was erected in the year 1787, is a neat frame building, fifty feet long and twenty-four feet wide, and ftands in Naffauftreet.

The Clergy of the Prefbyterian Churches of this city are maintained by the revenues arifing from the rents of their pews.

There are three Epifcopal Churches in New York, under one charter, which was granted the fixth of May, 1697. Trinity Church was built in the year 1696, and at feveral times afterward, improved and enlarged. It was fituated on the Weft fide of Broadway, in view of the Hudfon, with a fpacious cemetery on each fide; including the tower and chancel, it was about one hundred and forty-eight feet in length and seventy-two in breadth; and the fleeple one hundred and seventy-three feet in height. This was fuppofed to be the moft flately building of the kind in America, but it was deflroyed in the fire which happened juft after the Britifh troops entered the city, in 1776. It is now in contemplation to rebuild it; and several thoufand pounds are already fubfcribed for the purpofe.

St. George's Chapel, in Beekman-ftreet, was finisthed in 1750. This is a neat building, formed with hewn-ftone, and the roof tiled.

St. Paul's Chapel, in Broadway, was completed in 1766. This building, which is in itfelf elegant, is embellished with a superb monument, erected by order of Congress and at the expense of the United States, to the memory of the brave General Montgomery, who fell in the attack of Quebec, December, 31, 1775.

To the foregoing may be added the following Churches:

German Lutheran	2
Roman Catholic	I
Friends' Meeting	I
Anabaptifts	I
Moravians	
Jews Synagogue	I

Hudfon River was first discovered in 1608, by Henry Hudfon, an Englishman, who fold his claim

IO

to the Dutch. In 1614, the States General granted a Patent to feveral merchants for an exclusive trade on the river Hudson. The fame year this Company built a fort on the Weft fide of the river, near Albany, and named it Fort Orange. The next year a fort was built on the South-weft point of Manhattan's, now York ifland; but the first fettlers planted themfelves about two miles from this fort and built a church, there, the ruins of which, it is faid, are still visible, near the two mile stone on the public road. In this fituation, finding themfelves infecure during the Wars between the English and Dutch, they left this place and planted their habitations under the guns of the fort; which laid the foundation of the prefent city.

New York remained in poffeffion of the Dutch until 1664, when it was surrendered by Colonel Nicolls, who was commiffioned by James, Duke of York, to whom his brother, Charles II, of England had made a grant of it, the fame year. In 1667, at the peace of Breda, New York was conferred to the English, who, in exchange, ceded Surinam to the Dutch. In the war of 1673, the Dutch again poffeffed themfelves of New York; but at the treaty of peace, figned at Weftminfter, the following year, New York was reftored to the English, in whofe hands it remained till the late Revolution.

While New York remained in poffeffion of the Dutch, it was called New Netherlands and governed by a Schout, Burgomafters, and Schepens. From its furrender to the Englifh, in 1664, to 1683, the province was ruled by Governors, appointed and commiffioned by the Duke of York, and their council, whofe rules and orders had the force of laws. From the laft-named period, the people was admitted to a fhare of the legiflative authority. The government of the city (which was firft incorporated in 1696), is now in the hands of a Mayor, Aldermen, and Common Council. The city is divided into feven wards, in each of which there is chofen, annually, by the people, an Alderman and an Affiftant, who, together with the Mayor and Recorder, form the Common Council. The Mayor and Recorder are appointed annually by the Council of Appointment.

The Mayor's Court, which is held from time to time by adjournment, is in high reputation as a Court of Law. A Court of Seffions is likewife held for criminal caufes.

The fituation of the city is both healthy and pleafant. Surrounded on all fides by water, it is refreshed with cool breezes in fummer, and the air in winter is more temperate than in other places under the fame parallel.

York ifland is fifteen miles in length, and hardly one in breadth. It is joined to the main by a bridge called *King's-bridge*. The channels between Long and Staten iflands, and between Long and Yorkiflands, are so narrow as to occafion an unufual rapidity of the tides, which is increafed by the confluence of the waters of the Hudfon and Eaft river. This rapidity, in general, prevents the obstruction of the channel by ice; fo that the navigation is clear, except for a few days in feafons when the weather is uncommonly fevere. There is no bafin or bay for the reception of fhips; but the road where they lie, in Eaft-river, is defended from the violence of the fea by the iflands which interlock with each other; fo that, except that of Rhode-

Ifland, the harbor of New York, which admits thips of any burthen, is the beft in the United States.

The city is effeemed the most eligible fituation for commerce in the United States. It almost necesfarily commands the trade of one-half of New Jerfey, most of that of Connecticut, and part of that of Maflachufetts, befides the whole fertile interior country, which is penetrated by one of the largeft rivers in America, navigable one hundred and feventy miles. This city imports most of the goods confumed between a line thirty miles East of Connecticut river, and twenty miles Weft of the Hudfon, which is one hundred and thirty miles; and between the ocean and the confines of Canada, about two hundred and fifty miles; a confiderable portion of which is the beft-peopled of any part of the United States; and the whole territory contains at leaft half a million of people, or one-fixth of the inhabitants in the Union. Befides, fome of the other States are partially fupplied with goods from New York. But in the ftaple commodity, flour, Pennfylvania and Maryland have rivalled it-the fuperfine flour of those States commanding a higher price than that of New York.

In the manufacture, likewife, of iron, paper, cabinet-works, &c., Pennfylvania exceeds not only New York, but all her fifter States. In times of peace, however, New York will command more commercial bufinefs than any town in the United States. In time of war, it will be infecure, without a marine force; but a fmall number of fhips will be able to defend it from the moft formidable attacks by fea.

Eight miles northward of the city, is a ftrait between Long and York iflands, which is, with great

propriety, called Hell-gate. The paffage is narrow, and the middle of it is obstructed with rocks, fo as to occafion a moft violent rapidity of the tides. Except at high and low water, this ftrait is impaffable, without a ftrong breeze fufficient to counteract the current, and even then the navigation is extremely hazardous. The tides which flow from the Eaft and Weft, meet at Frog's Point, feveral miles to the eaftward of Hell-gate ; for which reafon the ebbing and flowing are remarkably fudden at this place. The channel at Hell-gate is deep enough for frigates, but veffels ufually wait for high or low water, when the fea is generally fmooth, and the ftrait is navigable on each fide of the rocks.

A want of good water is a great inconvenience to the citizens, there being few wells in the city. Moft of the people are fupplied, every day, with frefh water, conveyed to their doors in cafks, from a pump near the head of Queen-ftreet, which receives it from a pond, almost a mile from the city. Several propofals have been made by individuals, to fupply the citizens by pipes ; but none have yet been accepted.

The following is the character of the inhabitants of this city, drawn by a faithful hand in 1756:

"New York is one of the moft focial Places on the Continent. The Men collect themfelves into weekly Evening Clubs. The Ladies, in Winter, are frequently entertained either at Concerts of Mufick or Affemblies, and make a very good appearance. They are comely and drefs well, and fcarce any of them have difforted Shapes. Tinctured with a Dutch Education, they manage their Families with becoming Parfimony, good Providence, and fingular Neatnefs. The Practice of extravagant Gaming, common to the fashionable Part of the fair Sex, in fome Places, is a Vice with which my Countrywomen cannot juffly be charged. There is nothing they fo generally neglect as Reading, and indeed all the Arts for the Improvement of the Mind, in which, I confefs, we have set them the Example. They are modeft, temperate and charitable; naturally fprightly, fenfible, and good-humoured ; and, by the Helps of a more elevated Education, could poffefs all the Accomplifhments defirable in the Sex. Our Schools are in the loweft Order; the inftructors want Inftruction; and through a long fhameful Neglect of the Arts and Sciences, our common Speech is extremely corrupt, and the Evidences of a bad Tafte, both as to Thought and Language, are vifible in all our Proceedings, publick and private.

"The People, both in Town and Country, are fober, industrious, and hofpitable, though intent on Gain. The richer Sort keep very plentiful Tables, abounding with great Varieties of Flesh, Fish, Fowl, and all kinds of Vegetables.

"The Inhabitants of this Colony are in general healthy and robuft; taller, but fhorter lived, than Europeans; and, both with Refpect to their Minds and Bodies, arrive fooner to an Age of Maturity. Breathing a ferene, dry Air, they are more fprightly in their natural Tempers than the People of England; and hence Inftances of Suicide are here very uncommon. Few Phyficians amongft us are eminent for their Skill. Quacks abound like Locufts in Egypt; and too many have recommended themfelves to a full Practice and profitable Subfiftence. This is lefs to be wondered at, as the Profeffion is under no kind of Regulation."-Smith's History of New York, page 211.

Admitting this be a candid reprefentation of facts, at the time it was drawn, yet many material changes have taken place which ought to be noticed.

The change of the inhabitants, by the Revolution, was confiderable, and had fome effect upon the general character of the citizens. Notwithstanding, in point of fociability and hofpitality, New York is hardly exceeded by any town in the United States. The principal families, by affociating, in their public amufements, with the middling clafs of well-bred citizens, render their rank fubfervient to the happinefs of fociety, and prevent that party-fpirit, which an affectation of fuperiority in certain families in Philadelphia, has produced in that city—a fpirit which diffurbs or deftroys their public amufements, and which has given the citizens, too generally, perhaps, the reputation of being *inbofpitable*.*

Several caufes, however, have operated to diminifh the fociability of the citizens of New York, particularly the change of inhabitants and the lofs of property, during the ravages of war, and the unfavorable flate of businefs fince the eftablifhment of peace. Thefe caufes have had their influences in all parts of America; and perhaps as little in New York as in any other town.

*It is presumed that the general character of the citizens in all our large towns, is, in some measure, formed by the manners of the prewailing sect or nation. The reserve of the Quakers in Philadelphia has been communicated to all classes of citizens, and assists in forming their general character. The neatness, industry and parsimony of the Dutch, were the characteristics of the citizens of New York, before the revolution; and will probably be visible in their manners a long time after national distinctions are lost.

The charge of neglecting reading and the improvements of the mind, might be juft in Smith's time, but, if juft, it did not lie folely againft the inhabitants of this city. That the Americans were formerly, and may beft ill, behind the citizens of London, in their attention to literature and the arts, will be acknowledged, nor is it furprizing. Yet, no perfon acquainted with the well-bred American ladies, can charge them, generally, with ignorance; and there are great numbers in New York whofe minds are highly improved, and whofe converfation is as inviting as their perfonal charms.

Nor are the fchools in this city in fuch a deplorable fituation as they were formerly. There are many which are kept by reputable and able men; and Columbia College affords a very favorable profpect.

It muft not, however, be concealed, that Smith's defcription of the flate of education is now but too juft, with refpect to the country at large. There are feveral good academies in the country; but many parts are either unfurnifhed with fchools, or the fchools which they have are kept by low ignorant men, and are confequently worfe than none. This remark may be extended to a large proportion of the United States.

An enquirer, who would wifh to acquaint himfelf with the true flate of the people of New York, their manners and government, would naturally alk the citizens for their focieties for the encouragement of fciences, arts, manufactures, &c.? For their public libraries? For the patrons of literature? For their well-regulated academies? For their female academies for inftructing young ladies in geography, hif-

tory, belles-lettres, &c.? Such enquiries might be made with propriety.

The practice of phyfic, it is prefumed, is on a better footing than when Smith wrote his *History*. That it is capable of many improvements, in all parts of America, will hardly be denied by the faculty themfelves. There are, however, many eminent phyficians and furgeons in New York ; and it is only to be regretted that there exifts a neceffity of going abroad for knowledge which ought to be obtained at home.

All free governments abound with lawyers. Where men have the privilege of thinking and acting for themfelves, they will involve themfelves in debt and quarrel with their neighbors. In proportion to the debts and difputes of the people, lawyers will multiply. Of thefe, America furnishes a plentiful growth, and New York has its fhare. In this State, the practice of Law is conformed to the English mode ; and is, perhaps, better regulated than in the other States. The feveral degrees in the profeffion-the number of critical examinations that candidates are obliged to pafs thro before they can be admitted as Counfellors in the higher courts; together with the time of fludy required by the rules of admiffion, render an accels to the first honors of the bar so difficult as to preclude ignorant pretenders to the important fcience of law. New York can boaft of many men eminent in a very liberal profeffion, and which has hitherto furnished America with some of her most able legiflators. It is, however, to be feared that a too rigid adherence to the forms of legal procefs, in England, has fometimes perplexed the road to juftice, and prevented valuable improvements in the

practice, not only of this, but most of the States.

On a general view of the City, as defcribed thirty years ago, and in its prefent flate, the comparison is flattering to the prefent age, particularly the improvements in tafte, elegance of manners, and that eafy, unaffected civility and politeness which form the happines of focial intercours.

It is found, by a memorandum in one of the old Regifters, that the number of inhabitants in the City, taken by order of the King in the year 1697, was as follows:

	(Men	946
Whites	Women	
winnes	Young men and boys	864
	Young women and girls	899

In the other States the Editor has not any official accounts of the number of inhabitants; but the following is a very correct effimate

0	
New Hampshire	102,000
Maffachufetts	330,000
Pennfylvania	330,000
Delaware	37,000
Maryland whites 170,000	517
blacks 80,000	
	250,000
Virginia, whites 252,000	
blacks 280,000	
	532,000
North Carolina, whites 164,000	55 /
blacks 60,000	
	224,000
South Carolina, whites 108,000	
blacks 80,000	
	188,000
Georgia, unknown. The account	,
which gives 80,000 whites and	

20,000 blacks, must be inaccurate.

The following account of the number of dwellinghouses in the principal towns of the United States is

given mostly from the Editor's own enumeration in the years 1785 and 1786. The round number nearest the actual number is given, merely to affist the memory. The difference, which is never greater than *five*, is immaterial.

* It is faid that Philadelphia contains 50,000 inhabitants. This account must be too high. I find by actual enumeration, that in fome towns the houfes contain nearly 9 souls each upon an average; but generally not more than 7; suppose 9 souls in a house in Philadelphia at the time this enumeration was made, viz. in March 1786, the inhabitants were but 40,500. I will allow 100 houses for mistake, and this mill make the inhabitants 41,400.

The inbabitants of New York in 1786, were less than 23,614; for in this number are included all the people on the island. The bouses were numbered and found to be 3,340. But suppose them 3,500, and the souls in each will not average 7; and this number is high enough for our towns in general.

Why should we estimate the inhabitants of Philadelphia higher than Boston and New York, the bouses in which will not average 7 souls? Suppose the bouses in Philadelphia to be 5,000, which is more than the real number, and 8 souls to a bouse, which is also more than the actual average number, and the inhabitants are on these principles, but 40,000. I cannot believe that this estimate is not too high, until I see the actual number published by authority.

In taking the number of bouses in different towns, I invariably found it to fall short, at least a fifth, of the common estimate made by the most judicious inbabitants.—The American Magazine, N. Y. March, 1788.

ECLIPSES.

THERE will be five Eclipfes this year, three of the Sun and two of the Moon.

The 1ft is of the Moon, January 14th, the former part vifible, and the latter invifible.

Beginning,	14th	Day,	at	6h.	58m.	JZ
Middle,	-	-	-	7	49	lor
End,	-		-	9	0	(Bi
Duration,		-	-	2	22	0.00

Digits eclipfed near 5, on the Moon's fouth limb. N. B. This eclipfe begins but 38 minutes before the fun rifes; fo only the beginning is vifible.

The 2d is of the fun, January 29th, at 40 minutes paft 6 o'clock in the evening, invfible.

The 3d is of the Moon, July 11th, visible in part, and calculated as follows:

Beginning of vifibility,	4h	. 1m.	
Beginning of total darknefs,	5	29	Mo
Middle, – –	5	55	21
End of total darknefs,	6	7	Ba
End of the Eclipfe,	7	30] •

Digits Eclipfed near 13

N. B. This eclipfe begins but 31 minutes before the Sun rifes; fo only the beginning is visible.

The 4th is of the Sun, July 25th, at 53 minutes paft 3 o'clock in the morning, invisible.

The 5th is of the Sun, December 20th, at 52 minutes paft 11 o'clock in the morning, invifible.

Moon's Latitude, 1° 22' South.

Common Notes and Moveable Feafts, for 1786.

Golden Number	I	Shrove Sunday, Feb. 26.
Epace	0	Ea4er Sunday, April 16.
Dominical Letter	A	Afcention Day, May 25.
Cycle of the Sun	3	Whitfunday, June 4.

To the Inhabitants of the City of New-York.

GENTLEMEN,

MR. FRANKS returns his fincere thanks to his Friends and the Public, for their kind and liberal encouragement towards his publication of the New-York Directory; he humbly requefts they may indulgently excufe any errors, inaccuracies, or omiffions, which may appear, and impute them only to the local difadvantages he laboured under, in this first attempt; as he intends in the future

(106)

editions, he fhall have the honour of annually prefenting them, to have it more in his power to be exact, correct and circumftantial; as the number of fubfcribers are but few (which he attributes to a want of knowledge of the utility of this production, it being the first of the kind ever attempted in this city;) he makes bold to call on the citizens at large, for every information, that they think will prove conducive to its future correctnefs. Their directions will be thankfully received and gratefully acknowledged by Mr. FRANKS, at his lodgings, No. 66, Broad-way, or at Mr. KOLLOCK's Printing-Office.

N. B. Mr. FRANKS has ready for Publication, a TREATISE of BOOK-KEEP-ING, digefted for the inland and foreign Trade of America.----This Work, which he hopes will prove very ufeful, he would willingly fubmit, previous to his putting it to Prefs, to the infpection of the Gentlemen of the Mercantile Line, and will confider himfelf much honoured if they favour him with their patronage, as he intends laying it before them at their refpective refidences.

The New-YORK DIRECTORY, will, in future, be published every *twentieth* day of *May* in each Year.

(107)

DAVID FRANKS, CONVEYANCER and ACCOUNTANT, NO. 66, Broadway.

BEGS Leave to return his fincere thanks to his friends and the public, for their paft favours, and hopes the cheapnefs of the following will continue him their favours:

Drawing a Leafe and Releafe, on Parchment, f. I I4 0 Ditto, ditto, ditto, on Paper, I 8 0 Ditto, a Bond, - - 0 8 0 Ditto a Power of Attorney, 0 I4 0

Mr. Franks having ferved a regular apprenticefhip to his father, a very eminent attorney in Dublin, and having, befides, transacted bufinefs, for fome years, for Counfellor Franklin of faid city, he hopes, will entitle him to the countenance of the Gentlemen of the Law Department in this metropolis; to merit whofe efteem and approbation, will be his particular fludy,---he will thankfully receive bufinefs from them on the moft reafonable terms.

N. B. To prevent complaints, generally arifing from employing unexperienced Clerks, Mr. Franks has lately engaged a young man from Dublin, of unexceptionable abilities.
