*The Social Evil* was first published under the direction of the Committee of Fifteen, a committee organised in the fall of 1900 to institute a searching inquiry, uninfluenced by partisan considerations, into the causes of the increase of gambling and vice in New York.

It is a study, however, that is far from being of merely local interest and application. The problem is considered in all its aspects and, for this purpose, reference has been made to conditions prevailing in other communities and to the different attempts foreign cities have made to regulate vice.
