Dear Mr. Lehman:

I send you enclosed a copy of a confidential report on the recent activities of The Nation Associates on the Palestine question.

The problem is one involving not simply justice for a tortured people, but truly one involving the peace and security of our own world.

It is our intention to continue the fight until it is won. The question, as you must know, comes up again in September at the next session of the General Assembly of the United Nations. In the meantime, our principal undertaking must be to assure that the United States, with its traditional policy on this question, does not become involved in any collusion with the British which would betray our pledges and endanger peace in the Middle East.

I have deliberately put it that way since the most disturbing information has come to us that various plans are being prepared which would have the effect of nullifying the undertakings of our government. These plans we will seek to defeat.

We shall hope to continue to have your support in this vital undertaking.

Cordially yours,

Freda Kirchwey
