November 3, 1932

Dear Herb:

In regard to the letter from Dr. Samuel Z. Freedman, President of The Medical Alliance, I should say the following:

I think you can come out flat-footedly against State medicine, because by that is undoubtedly meant the State practicing medicine, so I feel you are entirely safe in making that statement, just as you would, I am sure, say that the State should not go into business.

Your answer relative to the Compensation Law is good, and your answers 3 and 4 are just as excellent.

But you apparently did not answer the point of the proper enforcement of the Dispensary Act. You should, of course, be for the proper enforcement of the Dispensary Act, which is an act to prevent people who can pay from obtaining free services in the dispensaries.

If you like, I will call up Dr. Freedman and explain how you feel about these things.

Arthur (Lehman)
