NOTE: This chart emphasizes the two major approaches to the fields: Supply, and Field Program.

NOTE: The same type of organization is proposed for Austria and Hungary as for Czechoslovakia. It is, however, borne in mind that local and other conditions, as well as conditions affecting Supply, may add to, subtract from, or modify any scheme now tentatively considered for discussion.

The Chief of Mission is charged with developing procedures which will facilitate effective communication between the Supply Division and the Supply Branches, and between the Functional Divisions and the Functional Branches, in collaboration with the Chiefs of the respective Divisions, as well as among all other elements within the Mission including liaison of every order.
