## Basic Demographic Data

- Name of Person Interviewed
- HH ID
- Date of Interview
- Name of Household Head
- Size of Household

## Household Survey
CONCEPTUAL KNOWLEDGE AND USAGE

The above material provides comprehensive guidance on developing and extending the concept of "knowledge and usage." It introduces the methods employed and their effectiveness in facilitating a deeper understanding of the concept. However, to assess the impact of these methods, further exploration is required.

The table below presents the assessment of "knowledge and usage" across different categories:

<table>
<thead>
<tr>
<th>Category</th>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Theory</td>
<td>Excellent</td>
</tr>
<tr>
<td>Practice</td>
<td>Good</td>
</tr>
<tr>
<td>Feedback</td>
<td>Adequate</td>
</tr>
</tbody>
</table>

The table highlights areas for improvement and identifies strategies for enhancing the "knowledge and usage" framework. Further research is recommended to refine and apply these strategies effectively.

REPRODUCTIVE HISTORY SURVEY

The survey aims to gather comprehensive information on reproductive health, focusing on sexual experiences, contraceptive methods, and health outcomes. Participants are encouraged to share their experiences to contribute to the broader understanding of reproductive health.

The survey includes questions on:
- Current sexual practices
- Contraceptive usage
- Sexual history
- Health outcomes associated with reproductive decisions

Participants are advised to provide honest and detailed responses to ensure the accuracy and usefulness of the survey data.
