

Psych W1610 Short Syllabus – Readings & Dates

Introductory Statistics for Behavioral Scientists - spring 2012

Professor: Norma Graham (nvg1@columbia.edu)

TAs: James Cornwell (jfc2134@columbia.edu), Travis Riddle (tar2119@columbia.edu)

This schedule is tentative and may change as the semester progresses. The readings are from the textbook. To get a preview of what topics are going to be covered when, you can look through the table of contents of the textbook; and then, if you don't understand the words in the table of contents (which many of you won't), you might read the first couple of paragraphs of each chapter.

Textbook: *Stats: Data and Models*, 3rd edition, by De Veaux, Velleman, and Bock. Copyright 2012. Addison-Wesley (Pearson).

<i>Week</i>	<i>Dates</i>	<i>Readings from textbook</i>
