Columbia Symposium on Rewards, Habits and Learning, Sept 12, 2012

Please join us for a full day symposium on **Rewards, Habits and Learning: Towards an Integrative View of FrontoStriatal Function** that will take place at Columbia University on September 12th, 2012. The symposium will cover recent advances in understanding the role of frontostriatal circuits in cognition and is designed for lots of discussion about the functional role of this circuit in both health and disease.

The conference is open to the public, but space is limited and pre-registration is required (no fee). A preliminary schedule and information about registration can be found at [rewardshabitslearningsymposium.weebly.com](http://rewardshabitslearningsymposium.weebly.com)

Speakers include: Mark D'Esposito, Earl Miller, John O'Doherty, Liz Phelps, Trevor Robbins, Wolfram Schultz, and Daphna Shohamy.

Discussants include Columbia faculty from Psychology, Psychiatry and Neuroscience: Peter Balsam, Holly Moore, Kevin Ochsner, Daniel Salzman, Mike Shadlen, and Elke Weber.

The conference is sponsored by the CHDI Foundation, a private, not-for-profit research organization whose mission is to discover and develop drugs that slow the progression of Huntington’s disease (www.chdifoundation.org), with additional support from Columbia University's Psychology department and from the Italian Academy. The symposium is hosted by Daphna Shohamy (Psychology, Columbia University).
