FEB. 6TH – MAR. 30TH

11TH, MON.
4:00 P.M. "Novel Approaches to the Study of Cyclic Nucleotide Signaling." Jeffrey W. Karpura, U of Colorado. Biochemistry & Molecular Biology. 305-3885. 301 HSSC.

Sports scientists to convene for premier conference on 'Bricks and Clicks: Challenges in the Digital Age' February 13-15

On March 13-15, more than 250 campus facilities directors, administrators, planners, architects and builders from the north east and Canada will meet to explore the close relationship between technological demands of higher education in the 21st century and the physical space in which they are housed. The conference will be held at Columbia, where efforts to strike a balance between the preservation of its century-old McKim, Mead and White campus and the technological demands of higher education in the 21st century are ongoing. Sessions will be held in Alfred Lerner Hall. For more information and conference fee go to: www.ccsu.edu/planning/nascup.
The bride and groom enjoy a rare moment alone in “Monsoon Wedding.”

March. “It is such a pleasant surprise,” says Arress of the accolades and the acclaim she has received. “We are very pleased.”

An up-and-coming young screenwriter, Arress has already received great accolades. Her short film, “Saarjash Night Falls,” was nominated for a Student Academy Award. The film received an award from New Line Cinema for Most Original Film at the Polo Ralph Lauren New Works Festival in 2000 and was cited as Best of the Festival at the Palm Springs International Film Festival.

Sabrina Arress is a young film-maker of enormous range and ability,” says Dan Kleinman, chair of the Barnard College president. “It also forced us to think differently about the-
