BY KRISTIN STYLING

In his initial year in the School of the Arts, Jerome Hairston, MFA '01, was working on his first exercise as a playwriting professor and associate theatre arts professor Eduardo Machado. But he never imagined that "A M. Sun-minute, " the first full-length play that grew out of that workshop, would be accepted into the prestigious Humana Festi- val of New American Plays three years later.

Since graduating from Colum- bia's MFA Theatre program in May, Hairston has had a whirlwind season. In August, he began a playwriting fellowship at the Manhattan Theatre Club (MTC), the first of its kind at a New York-based theater to offer a permanent academic structure to its ongoing playwriting fellows. In the works for next fall is a production of Hairston's play "Havana is Winning," accepted for next year. Joining Bogart at the 2002 festival was fellow alumnus and associate theatre arts professor, Eduardo Machado, who was the star of the festival with his play "The Last of the Drouns in Sand" (which played this past fall at the Cherry Lane Theatre in New York City). The title "Havana is Winning" is the tale of an interracial couple who stand in one another's lives. The play begins on a Sunday morning and is the tale of an interracial couple who stand in one another's lives. The play begins on a Sunday morning and that of their two young sons.

Variety of New Courses Debut This Spring in Many Departments

BY SUANN TRUDEL

Each semester, Columbia offers dozens of new courses, some based on developing interests by individual professors, others on breakthroughs and significant developments in organizations and developments that lead the academy and society at large to new thinking and action. Columbia's academic departments offer new perspectives in many fields, and Columbia's School of the Arts, in a collaboration with the Columbia, has a wide variety of courses and general knowledge that is important and necessary for all students. Columbia's new Department of Evolution, Education and Environmental Biology – E3B for short – is one of the many new programs that have attracted substantial interest from students in its short life. Receiving 100 applications for nine spaces in its short life, it has attracted substantial interest from students in its short life. Receiving 100 applications for nine spaces in its short life, it has attracted substantial interest from students in its short life.
