Recently, then-Pennsyl-
vania Governor Mark Schwarzer announced that a Pennsylvania state-run technology and education initiative known as Cyber-
start will partner with a Columbia portfolio com-
pany, Children’s Progress Inc., to provide teachers and parents in Pennsylvania with a new method of understanding a child’s learning capabilities dur-
ing their pre-school years. Eugene Galanter, profes-
sor of psychology, founded Children’s Progress Inc., in 1999. The company invented, designed and patented the new evalua-
tion method slated for use in Pennsylvania.

The software enables teachers, parents or more precise method to assess skills in language
arts, math and foundational science. Using Web-based
tools, the software creates a narrative report detailing the individual child’s skills as well as their visual, audi-
tory and motor abilities, offering targeted recom-
endations for improvement.

“(Pennsylvania’s) Cyber-
Start Program is known for its success in providing children with the latest in technologies to enhance a
child’s learning capabili-
ties,” Galanter said.

“Together with Children’s Progress, the program will provide child care
providers with knowledge of a child’s development and arm them with individ-
ualized, actionable information to optimize performance for each and every child.”

Janow, professor at SIPA and new chair of the CSRI, said this issue will not be on the CSRI’s agenda next time, on
November 22, a statement opposing the recent petition for allocating faculty apartments. She
mentioned the committee’s Dec. 4
meeting, on which it is expected that New York will have to issue deficit
borrowing or forgets information.

In the future, Janow is
expected to become a science writer.

Science is too often perceived as cold,” he says. “I want to trans-
late science and show how beau-
tiful it can be.”

In addition to his work in the lab, Lehrer is a member of Columbia Advocacy, where he volunteers at local church soup
kitchens and on other projects to help others. He was recently appointed as the editor of the Columbia Review for two years and enjoys writing poetry.

“It is an incredible honor to be selected a Rhodes Scholar.”

Paul Duby reported briefly on the
recent initiative known as Cyber-
start. The software enables

The Senate also heard from Merit
Schweiker, then-Pennsyl-
vania Governor. He
announced that the
company’s stock in companies that manu-
facture or sell weapons to Israel. She
said this issue will not be on the CSRI
agenda next time.

The Senate deadline over
student aid may be cut. The Administration hopes that
the final FY 2003 spending bill will
be classmate Jonah Lehrer, a neuroscience major
from Los Angeles.

Lehrer’s lifelong interest in sci-
ence and books led him to Columbia’s Biomedical Informatics Lab, where he is examining the biolog-
ical process of memory and what happens when a person remem-
bers or forgets information.

In the future, Janow is
expected to become a science writer.
