Quotable Columbian:

“In New York, there was controversy over what kind of memorial should be built downtown, and what the planned Museum of Freedom would or should contain. The New York museum could teach people about the psychological causes of war and its medical and psychiatric consequences. As time passes, the issues raised by Sept. 11 are going to get more complicated and more disturbing, not easier as we confront our collective and at times conflicting impulses toward remembrance.”

collection and at times conflicting causes of war and its medical and psychological consequences. The New York museum could teach people about the psychological causes of war and its medical and psychiatric consequences. As time passes, the issues raised by Sept. 11 are going to get more complicated and more disturbing, not easier as we confront our collective and at times conflicting impulses toward remembrance.”
