For the first time in four years, the participants in SIPA’s NORTHERN IRELAND COMMUNITY BUILDERS PROGRAM, consisting of 22 police officers, community leaders and social agency workers, agreed to pose for a group photo at the program’s end in previous years, they’d shied away from this for fear they’d be seen as compounding for the ‘other side.’ This easing of group tensions mirrors the progress of the North Irish peace process, which took a major step forward when the Irish Republican Army (IRA) officially renounced violence last summer.

Law

A landmark study led by the Medical Center to find a GENETIC LINK TO ALZHEIMER’S will double the number of families being studied under a new $10 million, five-year grant from the National Institute on Aging ... Researchers at the MAILMAN SCHOOL OF PUBLIC HEALTH have been awarded a $10 million grant from the National Cancer Institute to conduct a chemoprevention trial of 4,500 adults in Bangladesh who were exposed to very high levels of arsenic in drinking water. The researchers will focus on reducing the high rates of skin cancer and other cancers in this population, which are believed to be a result of arsenic exposure.

The Breast Cancer Research Foundation has awarded 2005-2006 grants to Mailman School scientists REGINA SANTELLA, professor of environmental health sciences; RUBY T. SENIE, professor of clinical epidemiology; and MARY BETH TERRY, assistant professor of epidemiology. ... Honors are being announced by the SCHOOL OF DENTAL & ORAL SURGERY. Pediatric dentistry resident MARK LIU has been selected for the Kellner Scholarship for Emerging Leaders in Public Health, to take place at the University of North Carolina Institute for Public Health. Faculty members JOSEPH MCMANUS, RON MYERS, MURRAY SCHWARTZ, STEVEN SYROP and DANIEL ZEDEKER, who are currently involved in the American College of Dentists, have been honored.
