

## **You are invited to join Intel for three Virtual Events and a Virtual Career Fair!**

Come learn about Diversity at Intel! From November 3, 2009 – November 10, 2009, we are hosting three diversity-focused web-based events and launching a three-week Virtual Career Fair. The first event features the perspectives and experience of three technical females who are *Emerging Leaders* at Intel. Later that week, join four members from various employee groups as they discuss mentoring, networking, and leadership opportunities. Our last Diversity focused event will feature a trio of talented business women who have taken different paths integrating and creating a career with Intel.

### **What:**

- **Tuesday, November 3** – Society of Women Engineers (SWE) Emerging Leaders at Intel: Jennifer Bly, Kimberly Harr, and Deborah Stromberg
- **Thursday, November 5** - Employee Groups at Intel: Denise Davis, Danette Hilton, Thomas Lucero, Armando Torres
- **Tuesday, November 10** – Integrating at Intel:
- Monica Martinez-Canales, Patricia Perry, and Cristina Pieracci
- **PLUS**, our **Virtual Career Fair** and replays will run 10/29 through 11/17

**When:** On November 3 and November 5, events are from **12:00-1:00 pm Pacific** (3:00-4:00 Eastern). On November 10, the event is from **12:30-1:30 pm Pacific** (3:30-4:30 Eastern). Attendees of each event will receive advance access to the Virtual Career Fair at the conclusion of the presentations.

**Where:** To submit your questions and learn more, visit <http://www.intel.com/jobs/virtualevent/VE11032009.htm>

### **Connecting People Through Innovation**

At Intel, diversity is a way of life. It's the way we do business and the key to our success as an innovative leader in technology. We take great pride in the collective and individual talents of our diverse workforce and recognize that our employees have unique perspectives, abilities, and experiences, yet each person has one thing in common—a commitment to creating market-driving products and technology designed to make a difference. Over the years, Intel is honored to have received numerous awards and special recognitions for our leadership in diversity such as Working Mother Magazine's '100 Best Companies to Work for' list to being honored as a 'Best Diversity Company' by Diversity/Careers in Engineering & Information Technology.

**Intel is currently recruiting full-time and intern positions of all degree levels. Disciplines include:**

- Electrical Engineering, Computer Engineering, Chemical Engineering, Computer Science, Material Science, Mechanical Engineering, Chemistry, and Physics
- In addition, Intel regularly recruits all degree levels of engineering and business-related disciplines

**Additionally, we are looking for experienced candidates at all levels in a variety of Hardware, Software and Component Design Engineering and business-related roles.**

After each presentation, the presenters will answer submitted questions.

**Please forward this invitation and link to other students and faculty that may be interested in attending this event!**
