

K9d Shale including in the middle a 6 inch limestone stratum and at intervals a thin chert band..... 3 feet, 3 inches

40	Dalmanella subcarinata <i>Hall</i>	52	Meristella laevis (<i>Vanuxem</i>) c
41	Delthyris perlamellosa <i>Hall</i> R	83	Spirifer macropleura (<i>Conrad</i>) c
43	Eatonia singularis (<i>Vanuxem</i>)	95	Trematospira multistriata <i>Hall</i> r
47	Leptaena rhomboidalis (<i>Wilckens</i>)	117	Platyceras cf. gibbosum <i>Hall</i> R
50	Lingula sp.	123	P. sp. R

K10 A dark gray, calcareous shale. Lower New Scotland..... 2 feet, 8 inches

40	Dalmanella subcarinata <i>Hall</i>	113	Diaphorostoma ventricosum
47	Leptaena rhomboidalis (<i>Wilckens</i>)	(<i>Conrad</i>) R	
83	Spirifer macropleura <i>Conrad</i> R	140	Phacops logani <i>Hall</i> R

K11 Strata concealed. Lower New Scotland..... 12½ feet

K12 A dark blue, much cleaved shale, which weathers to a brownish yellow clay. Upper New Scotland..... 42 feet

K12a Comprises the lower..... 28 feet

The following fossils were found here:

24	Atrypina imbricata <i>Hall</i> c	52	Meristella laevis (<i>Vanuxem</i>) c
33	Coelospira concava <i>Hall</i> r	63	Pholidopsis ovata <i>Hall</i> r
40	Dalmanella subcarinata <i>Hall</i>	64	Rensselaeria cf. aequiradiata
41	Delthyris perlamellosa <i>Hall</i> R	(<i>Conrad</i>)	
42	Eatonia medialis (<i>Vanuxem</i>) r	82	Spirifer cyclopterus <i>Hall</i> r
43	E. singularis (<i>Vanuxem</i>) R	83	S. macropleura (<i>Conrad</i>) R
47	Leptaena rhomboidalis (<i>Wilckens</i>)	88	Stropheodonta becki <i>Hall</i>
50	Lingula sp. c	92	Strophonella headleyana <i>Hall</i>

The Lingulas occur in calcareous, phosphatic, clay nodules. No manganese was detected in the nodules. Hall¹ notes the occurrence of the nodules and their "uniformly elongated oval or ovoid form" in the New Scotland in Albany county, N. Y.

K12b Comprises the upper..... 14 feet

33	Coelospira concava <i>Hall</i> c	52	Meristella laevis (<i>Vanuxem</i>) r
40	Dalmanella subcarinata <i>Hall</i>	83	Spirifer macropleura (<i>Conrad</i>)
41	Delthyris perlamellosa? <i>Hall</i> R	127	Tentaculites elongatus <i>Hall</i> R
47	Leptaena rhomboidalis (<i>Wilckens</i>)
