

This year for Spring Break, I went with 10 of my friends to Jamaica. Over there, the weather was really nice and the scenery of the beach was really pretty. There were also many activities to do in Jamaica. We threw Frisbees and played volleyball on the beach.

Other than the activities on the beach, we went to a small mountain to play. This mountain had a beautiful waterfall. The waterfall's water was really warm so we could go in and swim. The mountain had many, different colored flowers. There were red ones, yellow ones, white ones and all of them looked so vivid.

We also saw alligators on a boat. The tour guide on the boat fed chicken meat to the alligators to show us how they eat. We also saw many different kinds of birds flying around. Their bodies were all sorts of colors.

Spring break passed really quickly, but it was really fun. I hope next year's Spring Break will be even more fun!
