

Tissue and Data Repositories and HIPAA

Philip R. O. Payne, MA
Department of Biomedical Informatics
Columbia University Medical Center

What impact has HIPAA had on Tissue and Data Repositories? Who has access to the information in Tissue and Data Repositories? What are the privacy and confidentiality considerations with human tissue and data stored in a repository? This presentation will discuss the regulations and requirements that encircle this controversial issue and the applicability of the HIPAA Privacy Rule as it relates to tissue and data repositories.
