

Developmental Check List

Use this worksheet to describe specific patients and their developmental behaviors. Comment on the implications for your approach to the child in how you examine them, how you talk to them and what kind of guidance you give the parents about difficult behaviors and about safety issues. Make note of gender differences as well. Use additional sheets as necessary.

Infants

Toddlers/Pre-School

School Age (5-8)

Adolescents (early)

Adolescents (late)
