BIOGRAPHY

Caroline Flammer is the A. Barton Hepburn Professor of Economics at Columbia University with joint appointments at the School of International and Public Affairs (SIPA) and the Climate School, and a secondary appointment at Columbia Business School. She currently serves as the Vice Dean for Research and Faculty Affairs at SIPA. Caroline is also a Research Associate at the National Bureau of Economic Research (NBER), a Research Fellow at the Center for Economic Policy Research (CEPR), and a Research Member at the European Corporate Governance Institute (ECGI). She is an expert in sustainable investing and the recipient of numerous prestigious awards. Her research examines whether and how sustainable finance and impact investing can help finance a more sustainable world. Moreover, her research examines how, and under which conditions, firms can incorporate environmental, social, and governance (ESG) considerations into their activities to enhance their competitiveness while strengthening—instead of undermining—the very system in which they operate and hereby play a critical role in addressing climate change, inequality, global health, and other grand challenges related to society and the natural environment. The Web of Science ranked her among the top-100 Highly Cited Researchers in the economics and business profession in terms of impact over the past 10 years. At Columbia, she serves as the Director of SIPA’s Sustainable Investing Research Initiative (SIRI) which aims to foster scholarship, education, and dialogue on system-level investing—the interplay and interdependencies between investment and major challenges such as climate change, biodiversity loss, poverty, and social inequalities. Among other roles, Caroline serves as the President of the Alliance for Research on Corporate Sustainability (ARCS), a global multi-disciplinary network of scholars fostering rigorous academic research on corporate sustainability, as a Council Member of the World Economic Forum (WEF)’s Global Future Council on the future of responsible investing, and as a Trustee at Domini Impact Investments. She also serves as Department Editor at *Management Science*.
