Publications of Daniel Bienstock

Books

Special Volumes

Journal and Conference Publications

17. Power line control under uncertainty of ambient temperature (with J. Blanchet and J. Li), CDC ’13.

44. A degree sequence problem related to network design (with O. Günlük), Networks 24 (1994), 195-205.

52. New results on rectilinear crossing numbers and plane embeddings (with N. Dean), J. Graph Theory 16 (1992), 389-398.

53. Bounds on rectilinear crossing numbers (with N. Dean), J. Graph Theory 17 (1993), 333-348.

57. Graph searching, path-width and tree-width (a survey), in *Reliability of Computer and Communication Networks* (Roberts, Hwang, Monma, eds.) DIMACS (1991), 33-49.

60. Excluding a forest quickly (with N. Robertson, R. Thomas and P.D. Seymour), *J. Comb. Theory (B)* 52 (1991), 274-283.

70. Average distance in graphs with removed elements (with E. Győri), *J. Graph Theory* 12 (1988), 375-390.
