Publications generated from NSF Funded Research

PI's NSF project record (2000 —)

page 14 of 'Project Description'

Refereed Journal Publications by the PI (with research associates)

1. G. Dasgupta. Greens functions for random media. *Journal of the Chinese Institute of Engineers*, vol. 23, 2000, pp.1 – 8.
2. G. Dasgupta. Iterative simulation for stochastically nonlinear large variability. *Journal of Aerospace Engineering*, vol. 13, no. 1, 2000, pp. 1 – 11.
3. G. Dasgupta, “Wachspress Interpolants on Convex Polygons,” *Symbolic Computation: New Horizons*, Tokyo Denki University Press, Japan, June 2001, pp. 233 – 247.
4. G. Dasgupta and J. Treil. Maxillo-facial frame: Finite element shapes. *The Mathematica Journal*, Wolfram Media, Ill., vol. 8, no. 2, 2001, pp. 235 – 246.
5. G. Dasgupta. Interpolants within convex polygons: Wachspress shape functions. *Journal of Aerospace Engineering*, ASCE, vol. 16, no. 1, January 2003, pp. 1 – 8.
6. G. Dasgupta. Integration within polygonal finite elements. *Journal of Aerospace Engineering*, ASCE, vol. 16, no. 1, January 2003, pp. 9 – 18.
7. S. Murray, G. Dasgupta, and P. Allen. Engineering analysis of Saint- Pierre Cathedral, at Beauvais, France. In *Proceedings of STREMAH 2003*, Greece. Wessex Institute of Technology, Ashurst, 2003.
8. G. Dasgupta. An analysis of isoparametric formulation on quadrilaterals using closed form shape functions. *Journal of Aerospace Engineering*, ASCE, to be published 2006.
9. G. Dasgupta. Stiffness matrix from isoparametric closed form shape functions using exact integration. *Journal of Aerospace Engineering*, ASCE, to be published 2006.
10. G. Dasgupta and E.L. Wachspress. The adjoint for an algebraic finite element. *Computers and Mathematics with Applications*, to be published 2006.

Refereed Journal Publications with Graduate Students

11. A. S. Publico and G. Dasgupta, “ALESSA: A general mean form computation algorithm,” *Am. J. Physical Anthropology*, December 2001.
12. G. Dasgupta, A. N. Papusha and E. A. Malsch, “First order stochasticity in boundary geometry: a computer algebra boundary element development,” *Engineering Analysis with Boundary Elements*, Elsevier Science, UK, vol. 25, no. 12, 2001, pp. 741–751.
13. G. Dasgupta and E. A. Malsch, “Boundary Element color interpolation for instrumentation, imaging and internet graphics industry,” *Engineering Analysis with Boundary Elements*, Elsevier Science, UK, vol. 26, 2002, pp. 379–389.
14. Elisabeth A. Malsch, John Jeffy Lin and Gautam Dasgupta, “Smooth two dimensional interpolants: a recipe for all polygons,” *Journal of Graphics Tools (ACM: 2005)* v.10 n.2 pp. 27–39
15. Elisabeth A. Malsch and Gautam Dasgupta “Algebraic construction of smooth interpolants on polygonal domains,” *The Mathematica Journal* (2005). v.9 issue 3 pp. 641–658
16. Elisabeth A. Malsch and Gautam Dasgupta “Shape functions for polygonal domains with interior nodes,” *International Journal for Numerical Methods in Engineering (Wiley: October 2004)*. v.61 issue 8 pp.1153–1172.

17. Elisabeth A. Malsch “Interpolation constraints and thermal distributions: a method for all non-concave polygons,” *International Journal of Solids and Structures* v.41 n.8. pp. 2165-2188.
18. Gautam Dasgupta and Elisabeth A. Malsch “Boundary element color interpolation for instrumentation, imaging and internet graphics industries,” *International Journal of Engineering Analysis with Boundary Elements*, Rencis ed. (Elsevier Science: January 2002). pp.379-389.
19. Gautam Dasgupta, Alexander N. Papusha, and Elisabeth Malsch “First Order Stochasticity in Boundary Geometry: A Computer Algebra BE Development” *International Journal of Engineering Analysis with Boundary Elements*. n.25 (Elsevier Science: February 2001). pp.741-751

Refereed Conference Publications

20. Elisabeth Malsch and Gautam Dasgupta “Shape functions for concave quadrilaterals,” *Computational Fluid and Solid Mechanics*, K. J. Bathe ed. v.2 (Elsevier Science: June 2001). pp.1617-1619
21. Elisabeth A. Malsch “Four-noded triangular finite elements,” In *Proceedings of the 15th Engineering Mechanics Division Conference of the American Society of Civil Engineers*, (June 2002).
22. Elisabeth A. Malsch and Gautam Dasgupta “Algebraic construction of smooth interpolants on polygonal domains,” *Challenging the Boundaries of Symbolic Computation: Proceedings of the 5th International Mathematica Symposium*, Peter Mitic ed. (2003).
23. Elisabeth A. Malsch “Concave finite elements for the cloning algorithm,” *Second MIT Conference on Computational Fluid and Solid Mechanics*, K. J. Bathe ed.v.2 (Elsevier Science: 2003), pp.2064-2066.
24. E. A. Malsch “Conforming polytope finite elements for soil-structure interaction” *Third MIT Conference on Computational Fluid and Solid Mechanics* (2005).
25. E. A. Malsch “Smooth and linear surface interpolations applied to three dimensional Boundary Elements,” *Boundary Integral Methods*, Reading, UK, September, (2004).
26. E. A. Malsch “Kinematic test functions: a general derivation applicable to any simply connected polygon,” (January 15, 2003).
27. Elisabeth A. Malsch “Interpolation constraints and thermal distributions” *Book of Abstracts, 14th US National Conference: Special Mechanics Session in Honor of Bruno Boley*, (June 2002).

Doctoral Thesis

Journal Publications from dissertation: A. S. Publico “ALESSA: A general mean form computation algorithm,” (Order a paper copy from the UMI database).

28. Elisabeth Malsch “Test functions for elliptic operators satisfying essential edge conditions on both convex and concave polygonal domains” (Order a paper copy from the UMI database).

Refereed Journal Publications by PhD Students

29. N. Sukumar and E. A. Malsch “Recent advances in the construction of polygonal finite element interpolants,” *Archives of Computational Methods in Engineering* (2005). v.11 n. 4.

Other Abstracts and Extended Abstracts and Department Reports

30. Yuan-Chun Liu and G. Dasgupta, “C++ Programs for Rational Polynomial Interpolants on Convex Polygons,” Columbia University Report, no. January 2002, CEEM- GD- 2002-1, New York, New York, 2002.
31. Elisabeth A. Malsch “Interpolation constraints and thermal distributions,” Book of Abstracts, 14th US National Conference: Special Mechanics Session in Honor of Bruno Boley, (June 2002, CEEM- GD- 2002-2)
32. Elisabeth Malsch “Kinematic test functions: a general derivation applicable to any simply connected polygon,” (January 15, 2003, CEEM- GD- 2003-1)
