

Public Perception of Climate Change: the New Climate Dice

A paper *Perception of Climate Change* will be published next week in the Proceedings of the National Academy of Sciences and is available to reporters via PNAS; stories are embargoed until 3 PM Monday 6 August. This is a paper submitted earlier this year under the title "Public Perception of Climate Change: The New Climate Dice". We were not allowed to keep Climate Dice in the title.

A "[popular science](#)" write-up on the paper is available on the [GISS web site](#) and some unpolished [Q&A on the paper](#) is also available.
