

## **Pipeline to Disaster**

04 April 2013

James Hansen

Please see op-ed in today's LA Times ([Pipeline to Disaster](#)).

Thanks for all the well wishes in response to the article in this week's NY Times re my leaving the government ([Climate Maverick to Quit NASA](#)). My aim in "retiring" is to have more time to focus on science, to try to make the science clearer to the public, and to connect the dots all the way to policy implications. The article raises some important science issues that I will clarify in my next post.

~Jim
