

Steve Schneider at National Center for Atmospheric Research (circa 1972).

Sophie's Planet #6: Chapter 9 (Getting a Job)

12 May 2020

James Hansen

Getting a job in the 1970s was not so easy. I needed the help of two curious characters, who were exploring the threat of an ice age. I got even more help from a beautiful young lady (draft of [Chapter 9](#)).

I opened a Twitter account @DrJamesEHansen, (<https://twitter.com/drjamesehansen>), but will minimize interactions until the book is finished.

Unfortunately, we accidentally deleted my May 7 tweet on Canada, urging Canadians to sign the petition <https://petitions.ourcommons.ca/en/Petition/Details?Petition=e-2542> . Information is still available on my website ([Fishing for the Big One – in Canada](#)), discussing the merits of a transparent carbon dividend. Only Canadians can sign the petition – thanks to all those who did so!

Anniek with Erik three days after his birth.
