

Disclosure Summary

4th Annual Columbia Endoscopic Course

June 9-11, 2021

Free, Virtual, and Live From

Columbia University Irving Medical Center

New York, NY

This fun and exciting course will introduce cutting-edge surgical techniques and the latest advances in patient care, including transcanal endoscopic ear surgery, transnasal Eustachian tube surgery, and advances in endoscopic sinus, skull base, and orbital surgery. This course is the first of its kind to feature dedicated endoscopic orbital surgery instruction! Our course is structured to provide participants with valuable techniques, tips, and pearls to bring directly into their offices and ORs. Each lecture includes the latest in equipment, therapeutics, evidence, and experience.

The Course Faculty features influential leaders from around the world. Our target audience includes otolaryngologists, including both general community otolaryngologists as well as subspecialists and academic practitioners, in addition to ophthalmologists and oculoplastic surgeons. The course will be open to surgeons at all levels of training, from experienced attending physicians to residents-in-training.

At the conclusion of this activity, participants will be better able to:

- Discuss the indications, techniques, and complications of endoscopic ear surgery.
- Discuss the indications, techniques, and complications of endoscopic Eustachian tuboplasty.
- Discuss the indications, techniques, and complications of endoscopic sinus and skull base surgery.
- Discuss the indications, techniques, and complications of endoscopic orbital surgery
