Climate Change Research: The Nexus of Natural and Social Sciences

Tuesday, July 1, 2014 - Tuesday July 8, 2014
Reid Hall, Columbia Global Center, 4 rue de Chevreuse, 75006 Paris
For more information and the application, please go to http://bit.ly/summerschool14

The Alliance Summer School began as a student-led initiative in 2012 in effort to promote interdisciplinary exchanges between doctoral students at Alliance institutions researching the nexus of science and policy.

The Summer School brings together world-class professors, industry experts and PhD students at a weeklong event. Our focus this year is on climate change research at the crossroads of natural and social science disciplines. The presentation and workshop sessions foster potential research collaborations and promote the exchange of ideas.

The organizing team is currently in the process of contacting potential speakers for 2014. Notable speakers from past Summer Schools include Eric Maskin, Nobel Laureate and Professor of Economics at Princeton; Jeffrey Sachs, Director of The Earth Institute at Columbia University; and Bob Watson, former IPCC Chair and current Director of the International Assessment of Agricultural Science and Technology for Development at the University of East Anglia.

Eligibility: Ph.D./Research-based Masters Students interested in climate science and policy

Participation fee: 60 EUR (to be confirmed, covers all lunches and refreshments)

Applications accepted on a rolling basis. Successful applicants will be notified within 3 business days.
