DeCarlo, L. T. (2011). On the analysis of fraction subtraction data: The DINA model, classification, latent class sizes, and the Q-matrix. *Applied Psychological Measurement*, *35*, 8-26.

Typo corrections:

In Table 1, Item 12 should be: 11/8 – 1/8   (the 11/8 looks like 1 1/8).

Second equation from bottom on p. 12 has extra parentheses, it should be:

$$p(\boldsymbol{\alpha}) = \int_\theta p(\boldsymbol{\alpha}|\theta)\, p(\theta)\, d\theta.$$
