435	Same	American Dipper	These are immatures; same bird a

“No bird like this has been seen since”
possibly imaginary (Sibley)
in Smithsonian)

(but some say “escape”, =} off again)

na & South America

N Amer bird (Wilson problem)

1 This bird is a female

23 This bird is a female

copied by Havell from Wilson !

thought females were new species & named Hemlock
a Pine Swamp Warbler)

ing a Hybrid as a species

bler, same species as # 103

This bird is an immature

ght new species, he named for George

poral) # 75

escape” “could not have been seen in Oregon”

Little Blue Heron

or: Old World species never observed in America

Maybe got there on a ship

dubious according to S.M. Low or maybe escape

in Mexico or S America

thought skin came from KY; AOU says highly questionable”

on from skin ??? from S or C America

thought it was new species

1's)) #35 JJA had trouble with Yellow W's

6

JJA thought it was new species

69 JJA thought he had news species

1's) # 35 Trouble again with Yellow Warbler

nley, which caused a big row

et a confusing fall warbler)
ought new species, because of song difference
lor was considered separate species at the time
A thought "Florida" was a separate species
nsidered separate species at the time
; considered separate species at the time

JA thought new species & named for friend

4.1
