

## March Global Temperature Update

To sign up for our monthly update of global temperature (Maps and Graphs), [click here](#).

Additional figures are on our [global temperature web page](#).

The first three months of 2017 are the 2<sup>nd</sup> warmest January-March in the instrumental record, about half way between 2016 (warmest) and 2015 (2<sup>nd</sup> warmest annual mean, 3<sup>rd</sup> warmest January-March).

Note that most of the monthly records were set in 2016.
