P6103 - Introduction to Biostatistics

COURSE DESCRIPTION

Biostatistics is essential to ensuring that findings and practices in public health and biomedicine are supported by reliable evidence. This course covers the basic tools for the collection, analysis, and presentation of data in all areas of public health. Central to these skills is assessing the impact of chance and variability on the interpretation of research findings and subsequent recommendations for public health practice and policy. Topics covered include: general principles of study design; hypothesis testing; review of methods for comparison of discrete and continuous data including ANOVA, t-test, correlation, and regression.

This course is part of the core course requirement for the MPH and is a prerequisite for other courses in the Department of Biostatistics and throughout the Mailman School of Public Health.

COURSE LEARNING OBJECTIVES

Students who successfully complete this course will be able to:

- Describe the roles biostatistics serves in public health and biomedical research;
- Explain general principles of study design and its implications for valid inference when, for example, identifying risk factors for disease, isolating targets for prevention, and assessing the effectiveness of one or more interventions;
- Assess data sources and data quality for the purpose of selecting appropriate data for specific research questions;
- Translate research objectives into clear, testable statistical hypotheses;
- Describe basic principles and the practical importance of key concepts from probability and inference, inductive versus deductive reasoning, including random variation, systematic error, sampling error, measurement error, hypothesis testing, type I and type II errors, and confidence bounds;
- Apply numerical, tabular, and graphical descriptive techniques commonly used to characterize and summarize public health data;
- Identify appropriate statistical methods to be applied in a given research setting, apply these methods, and acknowledge the limitations of those methods;
- Evaluate computer output containing statistical procedures and graphics and interpret it in a public health context; and
- Differentiate between quantitative problems that can be addressed with standard, commonly used statistical methods and those requiring input from a professional biostatistician.

INSTRUCTOR
Martina Pavlicova
Biostatistics Department, 722 W 168th Street, 6th floor, rm 635
Email: mp2370@columbia.edu or pavlicov@gmail.com
Phone: (212) 305-9405 (I prefer the use of email)
Fax: (212) 305-9408
Office hours by appointment

CLASS MEETING
Lecture: Mondays and Wednesdays
room: Mailman School Auditorium, 8th floor (Section 1, 2, and 3)
room: Hammer building rm. 301 (Section 4)
Recitation: Tuesdays and Thursdays
room: TBA

TEACHING ASSISTANTS
Teaching assistants are important members of the teaching team for this course and meet weekly with the
course instructor to discuss student progress and pedagogical strategies. Students are assigned to one TA and
his/her recitation section. During office hours, TA’s are available to provide guidance during your
preparation for exams and for clarification of key concepts from lectures and readings. Assistance can also
be sought via email or by setting up an appointment to meet for office hours. You are strongly encouraged to
leave ample time before an exam when seeking assistance.

By Monday evening, 09/13/10, the class will be divided into separate recitation sections (see in
CourseWorks), each led by one TA. Students must attend the recitation section in the classroom which they
have selected. Crossovers cannot be accommodated and will not be tolerated.

RECOMMENDED TEXT
Biostatistics for the Biological and Health Sciences
ISBN: 0321194365
Publisher: Pearson, Addison Wesley
Author(s): Marc Triola, Mario Triola
Publication Date: 2006

REQUIRED TEXT
The Cartoon Guide to Statistics (CGS)
ISBN: 0062731025
Publisher: Collins; 1st HarperPerennial Ed
Author(s): Larry Gonick, Woolcott Smith
Publication Date: February 25, 1994

ASSESSMENT OF LEARNING
Exam 1.................................................................24%
Exam 2.................................................................25%
Final Exam..........................................................30%
Homeworks (6) ....................................................21%

Late homeworks will not be accepted under any circumstances! There will be no make up exams.
If there is a valid reason for missing an exam (with documented proof), you must notify the instructor one
week prior to the exam and a 54% or 55% weighting will be given to the final exam.
# LECTURES AND EXAM SCHEDULE

This schedule of lectures is only tentative. See Courseworks for updated information on lecture topics, assigned readings, and homework assignments.

| WEEK 1 | 9/7/2011 | Introduction to Biostatistics  
Data, Sampling, and Study Design: Chapter 1 (BIO), Chapter 1, 10 (CGS) |
| WEEK 2 | 9/12/2011 | Descriptive Statistics and Graphical Displays 1  
Chapter 2 (BIO), Chapter 2 (CGS) |
|        | 9/14/2011 | Descriptive Statistics and Graphical Displays 2  
Chapter 2 (BIO), Chapter 2 (CGS) |
| WEEK 3 | 9/19/2011 | Descriptive Statistics and Graphical Displays 3  
Chapter 2 (BIO), Chapter 2 (CGS) |
|        | 9/21/2011 | Probability 1  
Chapter 3 (BIO), Chapter 3 (CGS) |
| WEEK 4 | 9/26/2011 | Probability 2  
Chapter 3 (BIO), Chapter 3 (CGS) |
|        | 9/28/2011 | Discrete Probability Distributions  
Chapter 4 (BIO), Chapter 5 (CGS) |
| WEEK 5 | 10/3/2011 | Normal Probability Distributions 1  
Chapter 5 (BIO), Chapter 4, 5 (CGS) |
|        | 10/5/2011 | Normal Probability Distributions 2  
Chapter 5 (BIO), Chapter 4, 5 (CGS) |
| WEEK 6 | 10/10/2011 | Sampling Distributions and Estimators  
Chapter 5 (BIO), Chapter 4, 5 (CGS) |
|        | 10/12/2011 | Review |
| WEEK 7 | 10/17/2011 | Exam I |
|        | 10/19/2011 | One Group: Point Estimates, Confidence Intervals 1  
Chapter 6 (BIO), Chapter 6,7 (CGS) |
| WEEK 8 | 10/24/2011 | One Group: Point Estimates, Confidence Intervals 2  
Chapter 6 (BIO), Chapter 6,7 (CGS) |
