

ECON W4913 Undergraduate Seminar in Macroeconomic Theory- Spring 2011

Prof. Stefania Albanesi
Columbia University

SYLLABUS (Version: 1/13/2011)

Title

Women: Rights, Health, Education and Work

Description

Women experienced unprecedented advances in their social and economic standing in the U.S. and other advanced economies during the twentieth century: They gained economic and political rights, medical progress improved maternal health and enabled them to control fertility, they made tremendous investments in human capital. Labor force participation of married women, especially those with young children, rose dramatically, changing the structure of the family. Despite this progress, a substantial gender earnings gap persists and women are still underrepresented in top jobs. In this seminar, we will analyze the economic forces that contributed to these developments, discuss possible future trajectories in advanced economies and derive lessons for developing countries.

Requirements

Intermediate Macroeconomics, Intermediate Microeconomics and Econometrics

Schedule

Tuesday, 2.10-4 PM, IAB 1102

Office Hours

By appointment.

Readings

The following books are required:

Claudia Goldin. **Understanding the Gender Gap**. Oxford University Press 1990. (UGG henceforth.)

Francine D. Blau, Marianne A. Ferber, Anne E. Winkler, Marianne Ferber, and Anne Winkler. **Economics of Women, Men, and Work**. Prentice Hall, 2009 Sixth edition. (WMW henceforth.) You may purchase them new or used or borrow them from the library, where several copies of each are available.

The following book is highly recommended:

Francine D. Blau, **The Declining Significance of Gender?** Russell Sage Foundation, 2009. This book is available on Google's e-book store for a very moderate price.

There will be many research articles/papers assigned for the lectures and class presentations. The precise citation for each paper is reported in the *Topics* section of the Syllabus. You are expected to study *all* the papers assigned for my lectures and all the papers that will be presented in class. The assigned readings are available electronically, either on the library's online resources or from the authors' web page. Hard to find readings will be made available on Courseworks or in class.

Requirements

All students are required to make one **in-class presentation**. The in-class presentation will be based on a paper or group of papers chosen by the student from the syllabus. In addition, all students must complete one **paper** on a related topic. Papers may be empirical, theoretical, or institutional. Reviews of existing literature may also be acceptable.

Students must define the paper(s) for the in-class presentation by 2/22/2011.

Students must submit a paper proposal for approval by the instructor by 3/11/2011. For empirical papers, the proposal must contain a description of the data to be used.

Students must submit a completed paper by 5/13/2011.

Acceptable papers are 8-12 double-spaced pages including *all* tables and figures, set in 12 point times new roman script. All paper submissions will be electronic. Acceptable formats are Microsoft Word or PDF.

Grading

The in-class presentation will count for 40% of the grade, the paper will count for 40% and class participation will count for 20%.

Waldfogel J. 200. Understanding the "Family Gap" in Pay for Women with Children. *Journal of Economic Perspectives* 12: 137-156.

B. Student Presentations

Two students will present in each of the sections devoted to student presentations. Each student will pick a topic from the list below. I will then assign one or more papers for each presentation. **All students are expected to read *all* the papers featured in the presentations.**

The presentation should describe the main question in the paper and the tools used to answer the question. The presentation should also critically assess the paper and link it to the lectures and the other papers that will be discussed. A successful presentation will not only briefly and accurately convey the content of each paper or group of papers but also generate an active discussion on their contribution and significance.

Presentations should be prepared in PowerPoint or PDF format for electronic projection. Each presentation should last 50 minutes, including discussion time.

When you have decided your preferred presentation topic, please get in touch with the instructor to discuss the specific papers you might present. All students must define the papers for their presentation by 10/1.

Important note: If all presentations on a particular topic have already been claimed by other students, you will have to switch to a different topic. To ensure that your presentation is on your preferred topic, choose the topic early and communicate it to the instructor. It may not be possible for every student to have their first choice of topic.

Dates for student presentations: TBA
