OUTSIDE ACTIVITIES

Successfully proposed new method for seat allocation in engineering colleges in India. Member of the Technical committee, responsible for the mechanism and algorithm for joint seat allocation/admissions for over 30,000 seats at 88 centrally funded engineering colleges in India including the Indian Institutes of Technology, National Institutes of Technology etc. Implemented successfully in summer 2015, and again, with further improvements suggested by me, in 2016. I continue to be involved.

Regular conversations with data scientists at Airbnb, Upwork, Uber, Lyft and other sharing economy platforms.
