Group Sequential Methods in Clinical Trials

K. K. Gordon Lan

Johnson & Johnson Pharmaceutical Research and Development

About the Instructors

Senior Director, Johnson & Johnson PRD
K. K. Gordon Lan received his Ph.D. in Mathematical Statistics from Columbia University in 1974. Before joining Johnson & Johnson in 2005 as Senior Director of Statistical Science, he held positions as Mathematical Statistician at the National Heart, Lung and Blood Institute (NHLBI/NIH), Professor of Statistics at George Washington University, Distinguished Scientist at Pfizer and Statistics Fellow at Sanofi-Aventis.

Gordon has published more than 50 research papers in professional journals and has given more than 200 invited talks at universities and professional meetings. He is interested in statistical methods for clinical trial design and data analysis. Gordon was elected Fellow of the American Statistical Association in 1992 and Fellow of the Society for Clinical Trials in 2009.
