Announcements and useful information:

1. The Final Exam will emphasize the material since Exam #3 (approximately 50% new material and 50% other material).

2. The Final Exam is scheduled for Thursday, May 11 from 9→12.

3. Expect problems like (a) give the products, (b) provide syntheses, (c) show a mechanism. I have posted last year’s final exam in the library and on the web. The solutions are also in the library and should be on the web by early next week.

4. I will hold regular office hours, WITH THE COUPLE EXCEPTIONS LISTED BELOW, during the reading period and the exam period—all the way through Wednesday, May 10.

   Wednesday, May 3: 3→4 instead of 5→6
   Thursday, May 4: 2→3 instead of 3→4

5. Solutions to Problem Sets #13 and #14 are on reserve in the library. The solutions will be available on the web by early next week.

6. If you have not already done so, please complete a course evaluation form. These are available either from me or from Abigail Ahing in Altschul 607A. Completed forms should be turned in to Ms. Ahing. I appreciate and encourage your input!
