1. Page 65, Figure 1, it should be +/- k, not +/- \( \frac{k}{2} \)

2. Page 66, the last row of the utility function for H should read:
   \[
   \begin{cases} 
   0 & \text{if} \quad \begin{cases} x \leq x_H, l = \overline{c}, h = \overline{g} \\ x > x_H, l = \overline{c}, h = \overline{g} \end{cases} 
   \end{cases}
   \]

3. Page 67, in the first full paragraph, it should read “all searches with \( x \leq (x_H-k) \)”

4. Page 69, Proposition 2 should read
   For \( 1 < \nu \leq 5 \), \( \overline{U}R(\nu) = \{x \mid x_{H_{(b-v)}} - k < x \leq x_{H_s}\} \cup \{x \mid x_{H_s} \leq x < x_{H_c} + k\} \)
   Or, equivalently,
   For \( 1 < \nu \leq 5 \), \( \overline{U}R(\nu) = (\min(x_{H_s}, x_{H_{(b-v)}} - k), \max(x_{H_s}, x_{H_c} + k)) \)

5. Page 71, in the first full paragraph, it should read “For any positive value of \( k < .5 \),” or
   the word “strictly” should be dropped.
