

Year/Model Interchange List -- All Makes -- Cars and Trucks

08-Apr-11

Suggestions for using the YEAR/MODEL INTERCHANGE LIST (Clones/Sisters List):

This list is created for researching primarily frontal impact tests.

The CLONE ID field is now fully populated. For closest match, use exact number. For related vehicles, use any vehicles which share all but the last digit.

The first year produced may contain a reference to which vehicle the subject vehicle was based on, if applicable, or Whether the subject vehicle was a restyle of an existing vehicle. This may be of assistance in trying to find a greater sample of similar vehicles. This information will generally be listed ONLY in the first year of production. Remember that if you are concerned with Yaw Inertia, watch out for different wheelbases on the same model. These lists were produced with frontal crush data in mind.

Body=Type of construction. f=frame/body, u=unitized

Drive=Drive wheels. f=front, r=rear, 4 or a=all

Body Styles: 2d=2door,3d=2door Hatchback,4d=4door,5d=4door Hatchback,SW=Station Wagon

WB=Wheelbase. When more than one is listed, they correspond to the order of body style listing.

Please also allow me the standard disclaimer that I do not in any way guarantee the accuracy of these lists. Some similarities represent my own estimates, and some of the older years are by memory. Most are pulled from specifications tables which may contain inaccuracies all their own. Use common sense-if something seems wrong, check it (and tell me).

If you have suggestions, corrections, etc. contact Greg Anderson, Scalia Safety Engineering, Madison, WI (608)256-8020 Fax 256-0212, e-mail greganderson522@cs.com
