

# CU Physics Department Colloquium

Monday, February 22, 2010 4:10 PM 428 Pupin Hall

**Alexander Polyakov, Princeton University**

## From Plato to Quarks and Back

We will discuss the status of several important and interrelated theoretical problems, such as quark confinement, gauge/strings duality, cosmological constant etc. The present (incomplete) understanding of these questions is vaguely connected with some of Plato's images.

Hosted by Boris Altshuler

Meet the speaker will be held at 5:30 PM in 1124 Pupin
