

CURRICULUM VITAE (Abridged)

GEORGE SALIBA

PUBLICATIONS (up to 2009)

BOOKS AND OCCASIONAL PAPERS

Islamic Science and the Making of The European Renaissance (MIT Press, 2007); Turkish translation contracted, to appear by May 2009. Arabic translation, contracted to appear in 2008.

Rethinking the Roots of Modern Science: Arabic Manuscripts in European Libraries, Occasional Paper, Center for Contemporary Arab Studies, Georgetown University, Washington DC, 1999.

Arabic Scientific Thought: Origins and Development (in Arabic), Balamand University Center for Christian Islamic Studies, Lebanon, 1998, reviewed in: *al-Machriq*, Vol. 73, no. 2, 1999, pp. 531-533.

A History of Arabic Astronomy: Planetary Theories During the Golden Age of Islam, New York University Press, 1994, paperback, 1995.

The Astronomical Work of Mu'ayyad al-Dīn al-'Urḍī (d.1266): A Thirteenth Century Reform of Ptolemaic Astronomy, critical edition with English introduction of 'Urḍī's *Kitāb al-Hay'a*, based on all extant manuscripts, markaz dirāsāt al-Wahda al-'Arabīya, Beirut, 1990, 1995, 2nd. edition 2001.

From Deferent to Equant: A Volume of Studies in the History of Science in the Ancient and Medieval Near East in Honor of E.S. Kennedy, coeditor, *Annals of the New York Academy of Science*, NY, 1987.

The Crisis of The Abbasid Caliphate, an annotated translation of Ṭabarī's caliphate of al-Musta'in and al-Mu'tazz (862 - 869 A.D.), SUNY Press, 1985.

Planispheric Astrolabes From The National Museum of American History, coauthor, Smithsonian Institution Press, 1984.

The Final Quest in the Correction of Astronomical Principles, a critical edition of Ibn al-Shāṭir's *Nihāyat al-Sūl fī Taṣḥīḥ al-Uṣūl*, based on all the extant manuscripts (forthcoming)

ARTICLES

"al-Jāhīz and the Critique of Aristotelian Science," chapter in *Al-Jāhīz: A Muslim Humanist for our Time*, ed. Arnim Heinemann et al, Orient Institute Beirut, *Beiruter Texte und Studien* 119, Ergon Verlag Würzburg, Beirut, 2009, pp. 39-50.

PUBLICATIONS ARTICLES (Cont.)

- “Embedding Scientific Ideas as a Mode of Science Transmission,” chapter in *A Shared Legacy: Islamic Science East and West*, Homage to Professor J.M. Millàs Vallicrosa, eds. Emilia Calvo, Mercè Comes, Roser Puig, and Mònica Rius, Publicacions i Edicions Universitat de Barcelona, Barcelona, 2008, pp. 193-213.
- “The Scientific Tradition”, chapter in *The Islamic World*, ed. Andrew Rippin, Routledge, London and NY, 2008, pp. 289-304.
- “Illustrated Books May be Hazardous to Your Health: A New Reading of the Arabic Reception and Rendition of the *Materia Medica* of Dioscorides,” (co-author) *Ars Orientalis*, 2008, 35: 6-65.
- “China and Islamic Civilization: Exchange of Techniques and Scientific Ideas,” *The Silk Road*, 2008, 6: 9-17.
- “Islam and Modern Science: Lessons from the Past,” *Oxygen: La Scienza per Tutti*, April 3/2008, pp. 101-104, Italian version “Scienza e Islam: lezioni dal passato,” pp. 13-23.
- “Arabic Science in Sixteenth-Century Europe: Guillaume Postel (1510-1581) and Arabic Astronomy”, *Suhayl*, 2007, 7: 115-164.
- “Revisiting the Astronomical Contacts Between the World of Islam and Renaissance Europe: the Byzantine Connection” in *The Occult Sciences in Byzantium*, ed. by Paul Magdalino and Maria Mavroudi, La Pomme d’Or, Geneva, 2006, pp. 361- 373.
- “Islamic Science at Its Best,” Essay Review of *In Synchrony with the Heavens*. by David King, *Journal for the History of Astronomy*, 2006, 37: 233-238.
- “Horoscopes and Planetary Theory: Ilkhanid Patronage of Astronomers,” in *Beyond the Legacy of Genghis Khan*, ed by Linda Komaroff, Brill, Leiden and Boston, 2006, pp. 357-368.
- “L’astronomie Arabe,” in *L’âge d’or des sciences arabes*, Actes Sud, Institut du Monde Arabe, Paris, 2005, pp. 53-67.
- “Exchange of Goods and Ideas Along the Silk Road,” in *From Silk to Oil: Cross-Cultural Connections Along the Silk Roads, A Curriculum Guide for Educators*, ed. Martin Amster, China Institute, 2005, pp. 22-25.
- “Shams al-Dīn al-Khāfirī’s (d. 1550) Last Work on Theoretical Astronomy,” in *Sciences, Techniques et Instruments dans le monde Iranien (X^e-XIX^e siècle)*, eds. N. Pourjavady et Z. Vesel, Institut Français de Recherche en Iran, Presses Universitaires d’Iran, Teheran, 2004, pp. 55-66.

PUBLICATIONS ARTICLES (Cont.)

“Revisiting the Syriac Role in the Transmission of Greek Sciences into Arabic,” *Journal of the Canadian Society for Syriac Studies*, 2004, 4: 27-32.

“Aristotelian Cosmology and Arabic Astronomy,” in *De Zénon d’Élée à Poincaré*, ed, Régis Morelon et Ahmad Hasnawi, Peeters, Louvain, 2004, pp. 251-268.

“The World of Islam and Renaissance Science and Technology,” in *The Arts of Fire: Islamic Influence on Glass and Ceramic of the Italian Renaissance*, ed. Catherine Hess with contributions by Linda Komaroff and George Saliba, The J. Paul Getty Museum, Los Angeles, 2004, pp. 55-73.

“Arabic Planetary Theories and Their Impact on Copernican Astronomy,” in *Cosmology Through Time: Ancient and Modern Cosmologies in the Mediterranean Area*, Conference Proceedings Astronomical Observatory of Rome – Monteporzio Cantone, June 17-20, 2001, eds. S. Colafrancesco and G. Giobbi, Mimesis, Milan, 2003, pp. 153-160.

“Reform of Ptolemaic Astronomy at the Court of Ulugh Beg,” in *Studies in the History of The Exact Sciences in Honor of David Pingree*, eds, Charles Burnett, Jan P. Hogendijk, Kim Plofker, and Michio Yano, Leiden, Brill, 2004, pp. 810-824.

“Flying Goats and Other Obsessions: A Response to Toby Huff’s “Reply””, *Bulletin of the Royal Institute for Inter-Faith Studies*, 2002, 4: 129-141.

“Le Critiche a Tolomeo,” in *Storia della Scienza*, editor-in-chief Sandro Petruccioli, Roma, Istituto della Enciclopedia Italiana, 10v., 2001-, v. III, 2002, pp. 198-213.

“Alternative all’astronomia tolemaica,” in *Storia della Scienza*, editor-in-chief Sandro Petruccioli, Roma, Istituto della Enciclopedia Italiana, 10v., 2001-, v. III, 2002, pp. 214-236.

“Islamic Astronomy in Context: Attacks on Astrology and the Rise of the *Hay’a* Tradition,” *Bulletin of the Royal Institute for Inter-Faith Studies*, 2002, 4: 25-46.

“Greek Astronomy and the Medieval Arabic Tradition,” *American Scientist*, 2002, 90,4: pp. 360-367. Spanish version, “La Astronomía Griega y la Tradición árabe medieval”, in *Investigación y Ciencia*, Junio 2003, pp. 42-50. German version, *Spektrum der Wissenschaft*, “Der Schwierige Weg von Ptolemäus zu Kopernikus,” September 2004, pp. 76-83.

“Islamic Astronomy,” *Encyclopedia of Astronomy and Astrophysics*, 2001, sub, “Islamic Astronomy”

“Whose Science is Arabic Science in Renaissance Europe?,” posted in 2000 at:
